Paperpal Preflight for Editorial Desk + Editorial Manager®

Scholarly journals face costly bottlenecks and risks to research quality due to time-consuming, manual checks and increasingly sophisticated fraud techniques.

The seamless integration between Editorial Manager® (EM) and Cactus Communications' Paperpal Preflight for Editorial Desk (Preflight) offers publishers an automated manuscript assessment solution designed to streamline screening and drive trust in research.

Preflight's Suite of Checks

Language Quality

Research Integrity

Technical Compliance

Advanced Analysis

✓ Powered by custom-built AI models and human checks for conclusive results

✓ 45+ AI checks, with optional PhD expert reviews, help detect nuanced integrity issues

✓ Continuously enhanced based on evolving trends and user feedback calibration

Screen with Confidence

✓ Identifies compromised manuscripts in under 3 minutes, acting as a convenient safeguard

✓ Proven accuracy with >90 percent precision of integrity checks, minimizing false positives

✓ Supports compliance, improves research quality, and reduces risks of future retractions

Streamlined Workflow

✓ Automatically triggers analysis upon submission and on-demand, reducing manual screening

✓ Generates score with detailed reports directly within editorial workflow for a seamless experience

✓ Saves editorial staff time and resources, empowering journals to optimize workflow
