# End-To-End Book Publishing Workflows

Editorial Manager® (EM) and ProduXion Manager® (PM) are the industry leading editorial and production workflow management systems for scholarly journals, reference works, books, and other publications. Leveraging the power of both platforms for a flexible end-to-end solution, publishers can efficiently streamline and customize their multi-book workflows.

em Editorial Manager® · pm ProduXion Manager®

| Set Up Book & Chapters | Invite Contributors | Editor Assignment | Review & Commentary | Decision & Revision | Production Initiated | Create Index | Copyediting & Typesetting | Proofing & Corrections | Publication & Distribution |

Configure Tailored Workflows

- Manage multiple books and content types in a single system
- Set system permissions and transparency levels across user roles
- Customize instructions, letter templates, and submission forms
- Configure due dates, link submissions, and open discussion forums

Save Time with Automated Processes

- Build out books with sections, chapters, and table of contents
- Copy previous books to eliminate repetitive template creation
- Set cascading chain task assignments and automatic reminders
- Assign different editorial groups across different sub-sections

Centralized Visibility of Tasks & Data

- Store metadata (ISBN/ISSN, volume, issue/edition, budgets, etc.)
- Track performance metrics with robust, built-in reporting suite
- Monitor project statuses in real time through detailed dashboards
- Export in BITS XML format for publication and distribution
